GBS is an insurance claim technology corporation. Our focus is to assist organizations in developing a variety of technology - based programs that meet your specific goals.

Our job is to design and implement a program work flow around your goals that leverage our technology and resources to save your firm time and money.

We will assemble a team of experienced, quality professionals specifically for your project.

We would welcome the opportunity to work with your organization from plan conception through final implementation.

Comprehensive Medical Management Provides Positive and Effective Outcomes!

What is Medical Management?

Medical Management is a comprehensive approach to managing health care costs, care coordination, and intervention for plan members. Early access to Medical Management services provide members with the education and support necessary to maintain and enhance their level of wellness and quality of life.

Plan members often find themselves in a situation where they need information or direction. Medical Management is an excellent resource to assist plan members seeking other options, opinions, or simply education on a chronic condition.

Knowledge is power; thus, with the right information, plan members have the tools to make good medical decisions that lead not only to better clinical outcomes, but also to cost savings for the employee benefit plan.

All Medical Management results are in a comprehensive report that allows employers to make good health plan decisions.

Retrospective Review

Medical Management is the most effective way of reaching out to any plan member and arguably the only effective health plan tool that reaches across all benefit levels: Chronic Condition Management, Pharmacy Benefit Services, and Psychiatric and Mental Illness to insure proper and effective care are delivered to plan members.

GBS ensures that the plan deploys a quality and effective medical management program throughout the various benefit levels of the health plan.
